

An Easy To Clean Gel Support

Feel the comfort only a gel support can provide. This gel filled product offers soft, contoured support. What makes this support unique is that it can be cleaned using commercial cleaners, including chlorine washes. This makes them perfect for a medical building, laboratory facility or any area that needs periodic disinfecting.

The deep Sea Blue color makes this support an attractive addition to any keyboard application.

G19T

AtEase™ Washable Gel Support

Care and Cleaning

The gel support is chemically resistant and most common detergents and cleansers work well to remove soil. If bio-cleansing is required, a bleach solution may be applied.
